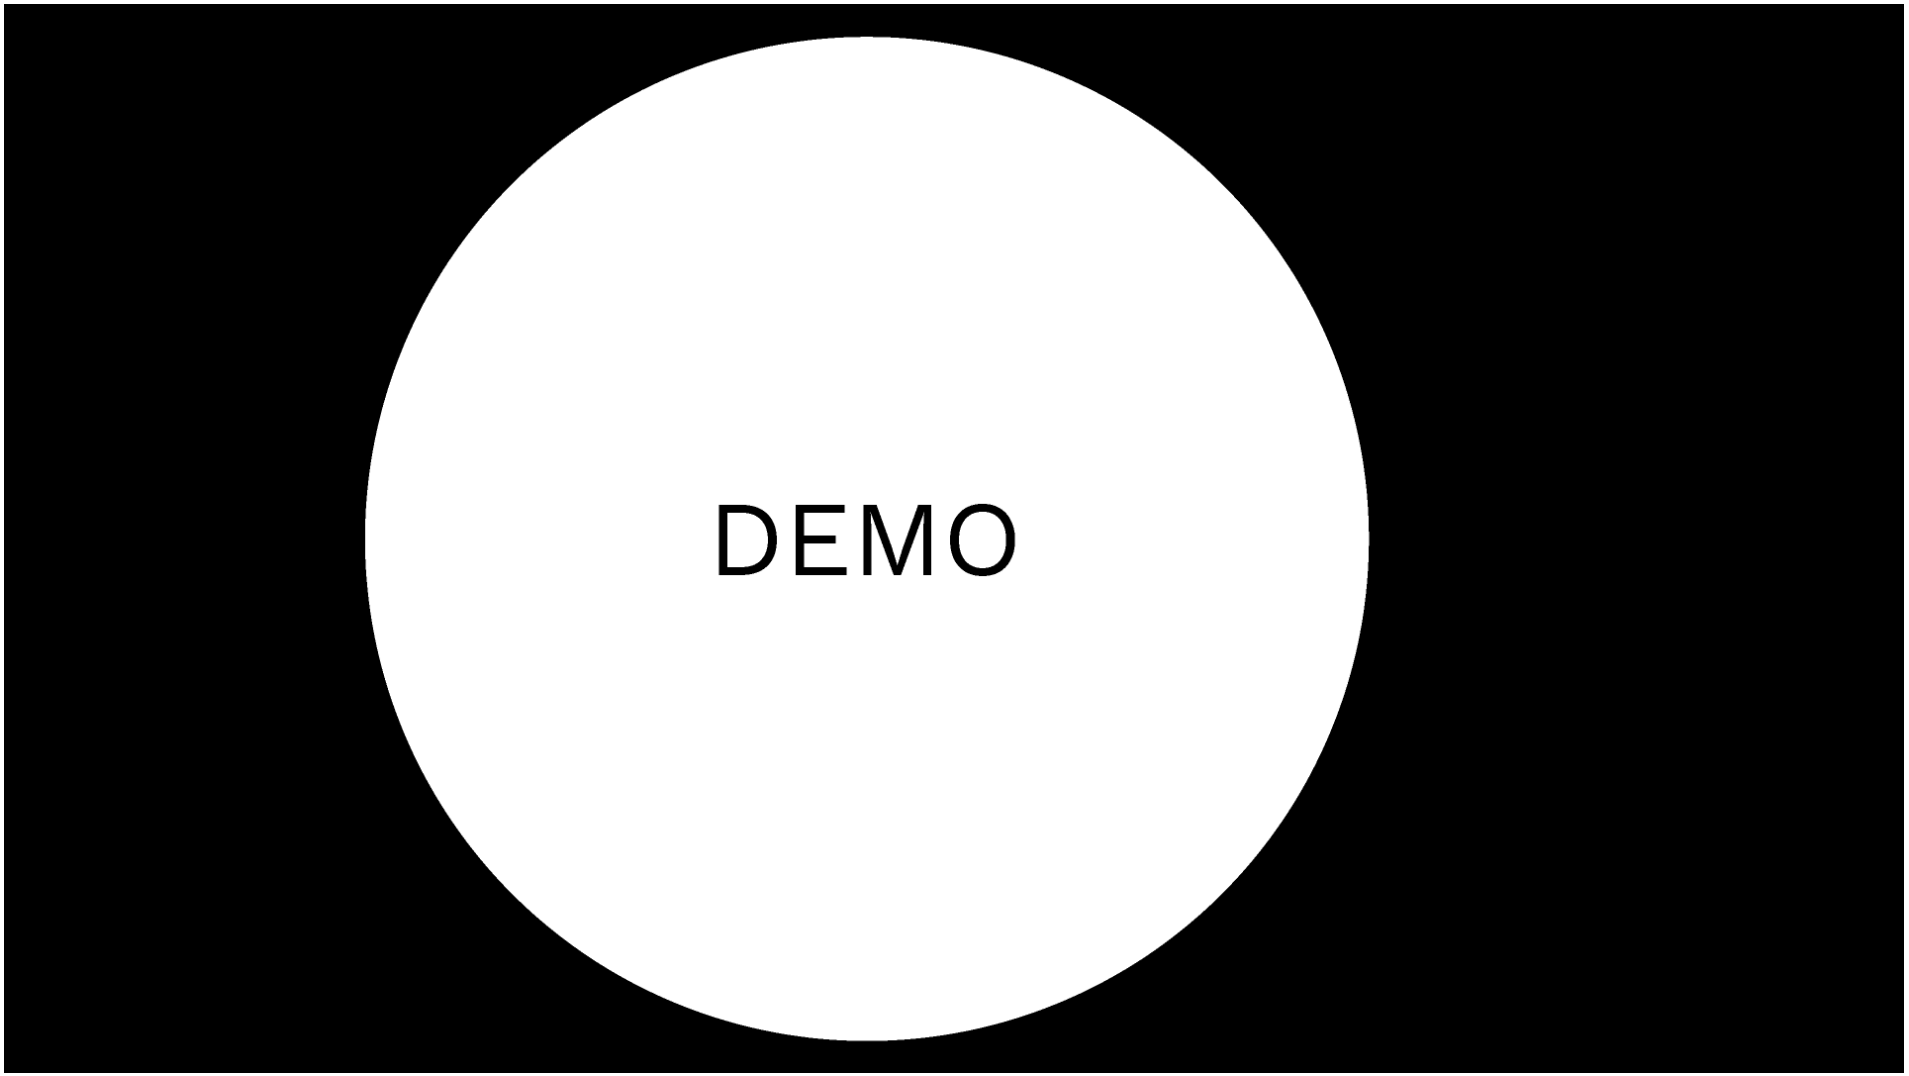
Wrapping Up



DEMO

My Design Process

// AND WHAT I LEARNT

- Wireframing
- Trello
- Mobile-up
- I wish I could tell you these steps were done in this order buuuuuuut...
- They weren't and the lessons that I've learnt

Considerations

- Accessibility
  - Device size
  - Theme colours
    - Content vs pictures
- Target audience
- Site layout
- Contact form
- Lazy loading

Future Features

- Learn PHP and deploy to a supporting web host to properly implement contact form
- Creating hover inverts for social media icons
- Animate the hover shadow effect on the emojis
- Creating a pseudo-element shadow for box shadows
- Better compressed images for page-load speed optimisation
- Better responsiveness

The Experience

- Super cool to have a visual representation of what we're learning and also our personality
- Specificity is the root of all problems ever
- Mobile-up is the only way to go
- Design, design, design
- Favourite part: toying around with JavaScript and seeing what it can do

Thank you for listening (:
